Hi Tom,

Our cost package to CFAC has been approved and should be going out at any time. They are supposed to notify me when this happens. I will let you know. Once we have funding we will be able to provide DEQ with some additional funding. Looks like your tracking what we have coming. I will keep you and all in the loop as we get tasks coming.

You were copied on the Phase I Data summary report and SLERA. I wouldn't put too much into the Draft HHER at this time. A cursory review should be enough at this time to make sure we are capturing the needed components.

We'll keep in touch.

Mike,

I am looking at the next three months of CFAC and the proposed work scope. I simply don't believe there is adequate funding to cover what is coming up. Joe and I did discuss, he is checking in on the billing to determine when Special Account funds may be available, so we are working on solving this as quickly as possible. What I'd like to check on with you is the work scope anticipated over the next few months;

Public meeting/Tour on October 5 – My plan today is for Dick to attend both to understand the layout of the site. Colleen may attend the public meeting in listening mode.

DSR Final (rcvd 9/19) – no formal review planned, but it needs to be checked in preparation of the draft baseline human health risk assessment and the draft baseline ecological risk assessment reviews. This is going to consume the majority of the dollars left in the bulk account funds and leave us pretty short by end of December.

Draft Human Health and Ecological Risk (November) - of the roughly 160 hours remaining, most if not all will be consumed by these two reviews.

Phase II Sampling (January) - This is a pretty key document for setting the 2018 work.

Just wanted you to know and to ask if you are anticipating any other key items that we are going to need to address.

Tom
